PERSONAL PROFILE

I am a junior frontend developer, currently earning a diploma in full stack software development with Code Institute. I'm experienced in HTML, CSS, JavaScript and Python with some knowledge of React and Angular. After working in the Public Health sector as a researcher in Spain and the United States for over six years, I decided to broaden my skill set and embark on a career as a frontend developer. Until September 2022, I was part of the Tech Support Team at Oct8ne where I combined my love of language learning and problem solving..

KEY SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, React.
- **Databases:** PENDING
- **Libraries:** PENDING
